

Please allow for more time and more disclosure before ruling on lifting restrictions on media ownership. Americans are already being given information from too few sources. A single corporate entity should not be the only source of information in any geographical area, whether it's the newspaper, TV or radio. This is a basic premise for freedom that the U.S Government should honor and protect. This sacred access to many opinions should not be a partisan issue, unless corporations are more important than a free people's right to information during a Republican administration. Please prove me wrong, and take more time for public process.

Thank you.
